Introduction & Company Overview

STT Electrical Services is a leading electrical contractor, providing a varied range of electrical services. Sam Tresize leads an experienced team of six including three qualified electricians, two Apprentices and office manager Emma who keeps every job running smoothly.

Building strong company ethics over the past 3 years Sam Tresize recognises the importance of safety, quality, people and culture being the backbone of this business. With these standards firmly in place the core of STT Electrical has a strong ability to provide exceptional services to their clients.

Safety

STT Electrical Services lead the way with their Work Health and Safety Management System, putting policies and procedures in place to ensure a safe work culture is a part of every job.

STT Electrical Services considers work health and safety an integral part of the success of the organisation and is committed to providing a safe and healthy work environment for all workers, contractors, clients and members of the public.

STT Electrical Services will do this as far as reasonably practicable, by eliminating or where this is not reasonably practicable, adequately managing work health and safety issues to prevent injuries, illnesses and dangerous incidents.

STT Electrical Services will:

- Ensure that it complies with all legislation relating to work health and safety
- Eliminate or minimise all workplace hazards as far as reasonably practicable
- Provide adequate information, procedures/ systems of work and training to enable all workers and contractors to do their jobs safely
- Consult, encourage and respect all workers' involvement in the improvement of work health and safety
- Provide appropriate safety equipment and personal protective equipment as required
- Continually seek improvement and monitor the changes with consultation of all concerned

Quality Work

Setting out the standards with every employee on the commencement of each job, using toolbox meetings ensures every team member working on site understands the commitment STT Electrical Services has made to their clients.

Processes include creating checklists for each job to ensure no step is missed, checking and signing off on each job makes every team member responsible for each task they complete, with a final check by management.

People & Culture

Over the past 6 years STT Electrical Services has maintained its vision to be an employer of choice. Providing an environment that all team members feel supported to do the best job they can, offer feedback to management and listened to regarding safety matters is part of the culture supported by STT Electrical Services. All team members understand that family comes first, therefore returning home safely to the people that matter the most to them and taking time out when family requires them is be at their side is part of the culture promoted by STT Electrical Services.

In return employees work hard, follow all policies and procedures with respect and promote STT Electrical Services with pride.

"We value each other's knowledge, experience and diverse cultural backgrounds with equal opportunity standards. Apprentices and qualified tradesmen, work together in an environment that is healthy and happy." Sam Tresize

Training is an integral part of any business and for STT Electrical Services, having two apprentices on board shows their commitment to their training policy. Branton Wheatley is a first-year mature age indigenous apprentice and Zac Roebig also a first-year apprentice, attend Electrogrouop on a regular basis learning new skills and gaining new experiences in the workplace.

All team members receive training when updates are required, refresher training and training in the safe operation of tools prior to using a new tool is a part of the Safe Management Plan.

Mission Statement

STT Electrical Services strive on delivering excellence on all job sites. We strive to create excellence through hiring experienced electrician who have knowledge across all areas of the industry. Priding themselves on presentation and delivering jobs to the required deadline and above and beyond expectations, our electricians are supported by our culture of safety and policies that assist them when making decisions.

Safety to all members on site and the public is our number one priority and concern. We ensure all job sites and works carried out are compliant with safety requirements.

Brief History

STT Electrical Services established in 2015, locally owned and have grown to a 6-person workforce growing rapidly.

Our Team

Professional, helpful and skilled tradespeople, at your service.

Our team is ready to help. We have years of experience and all the proper certification to back up the quality of our work. We spend regular time in professional development to stay up to date on quality standards, current trends and emerging technologies that save you time and money.

SAM TRESIZE - OWNER AND DIRECTOR

With more than 10 years' experience in the electrical industry, Sam's vision is to drive excellence in electrical services to new levels. Sam set up STT Electrical in 2015 to make his mark on the Rockhampton electrical industry and enjoys leading the team onward and upward every day. Under Sam's leadership, the business has grown continually in size and reputation for quality work.

To wind down, Sam packs up the family and heads off for some quality time - and if fishing or golfing is involved, all the better! When travel is on the cards, Bali is the family destination of choice.

JORDAN BROWN - FOREMAN

Jordan is a proud Central Queensland local who has built an enviable reputation for leadership in electrical services. Although Jordan's children think he only eats sausages on bread and visits the dump every day, he does much more! You might meet Jordan first up to discuss your quote and coordinate your job. He's a natural organiser and enjoys seeing a job completed well, from start to finish – including extensive testing!

Jordan drives quality with the team and with other tradespeople on commercial contracting and larger residential jobs. He claims (only half-jokingly) that AS/NZS 3000:2018 - the Australian standard for wiring rules - is his favourite reading. When he's not reading that, you'd find Jordan in the great outdoors with his family, camping around Central Queensland.

EMMA TRESIZE - OFFICE/ACCOUNTS MANAGER

Emma is our efficient and reliable accounts, payroll and office guru. As well as keeping all financial and managerial operations flowing smoothly, Emma keeps the team operating to the latest and highest legal standards and quality processes.

Although the office vibe is fun at STT Electrical Services, Emma balances work with plenty of family outings with her husband and two young children, visiting friends and exploring together.

LAUREN GOODGER - OPERATIONS COORDINATOR

Lauren is the essential ingredient in responsive customer relationships and smooth job completion. Being a super-organiser, Lauren schedules jobs, orders parts and gets the bookwork done so that the electricians can get on with what they do best.

Lauren really enjoys the tight team culture at STT Electrical Services, but she also enjoys her own chill time. Downtime finds Lauren at the beach or relaxing by a pool, enjoying road trips or spending time with her dachshund fur babies.

ABBY DENDLE - ADMINISTRATION ASSISTANT

Abby has the friendly voice you might hear on your first call to STT Electrical Services. As Lauren's right hand person, Abby is great at the detail that ensures our clients enjoy a seamless service, and our team works each day as efficiently as possible.

Abby's also studying to be a speech pathologist, but when she's not hitting the books, she loves team sports, particularly touch footy.

JOHN DOWNER - ELECTRICIAN

John knows electricity. He is highly trained and widely experienced. An excellent communicator and team player, you'll find him an asset on any job. He thoroughly enjoys the wide variety of work that STT Electrical Services is involved in, from major installations and upgrades through to repairing that annoying faulty plug.

John (and his faithful dog) also enjoy camping whenever he can on weekends, preferably accompanied by a 'low and slow' BBQ, watched over with a few mates and a couple of coldies.

ANDREW DONALDSON - ELECTRICIAN

Andrew's built a strong reputation - from working in the resources sector, with experience in large installations and underground work, right through to many residential installations and upgrades. Andrew particularly enjoys solar and air conditioning work – especially the moment the system is switched on and he can stand in front of the cool air!

Cool air is Andrew's happy place – he heads for the snow on holidays, given the choice. Andrew's most valuable lesson in the trade – never assume the power is off!

JOHN GOODFELLOW - ELECTRICIAN

John completed his apprenticeship with STT Electrical Services, and we're pleased he has stayed on as a fully-fledged electrician.

John has excellent experience across a broad range of electrical work, and enjoys meeting new clients and solving their electrical challenges. John enjoys a bit of footy, and his favourite holiday destination is Burleigh Heads at the Gold Coast.

APPRENTICES - STUART GABRIEL AND JOSH BAKSS

Committed to building the capacity of the local workforce, we're proud of our two apprentices.

Stuart and Josh bring a great work ethic to their apprenticeships. Both are learning and growing in experience daily and both have a bright future ahead in the electrical industry. Stuart and Josh appreciate working and learning with 'a great bunch of blokes.'
